Product description

Excellently made stereo loudspeaker cable for connecting amplifiers and power amplifiers to loudspeaker boxes. Preassembled with tube connectors, this loudspeaker cable is suitable for amplifier performances of up to around 90 watts of power per amplifier channel. The cable has been made with thin stranded copper wires (0.125 mm) which means that it is very flexible and highly conductive. The use of oxygen-free copper (OFC) for the inner conductor also ensures that an extremely clear and true-to-life sound can be achieved with this loudspeaker cable.
