Product description

The Highspeed Shape SL offers all of the characteristics and features of the high quality Highspeed SL HDMI cable, together with the additional benefits of flat, angled connectors. HDMI ports are often positioned very closely together, particularly on TV sets, which can cause problems when connecting conventional cables; the Highspeed Shape SL provides a solution to this issue. Digital signals are transmitted easily and in excellent quality thanks to its triple shielding element and oxygen-free OFC inner conductor. Furthermore, the cable is also equipped with two different HDMI connectors, which are angled by 40°. This makes the cable particularly suitable for side HDMI ports on LCD TVs. Multiple connectors can even be positioned one above the other in a "piggyback" configuration.
