## Product description

Four-wire installation loudspeaker cable (4 x 1.5 mm<sup>2</sup>) made from oxygen-free copper for cabling all kinds of PA systems and hi-fi systems. The 0.254 mm thick individual wires and the signal conductors have been twisted together to produce the best sound characteristics. This design that uses four individual wires means that many different connection combinations may be realized. The conspicuous colouring makes it easy to clearly identify this cable in cable channels.
