

# Pure Clock

<b>Product number</b>	D1C6075
<b>Weight</b>	0.124kg
<b>Length</b>	55mm
<b>Width</b>	235mm
<b>Height</b>	160mm

## Product description

High-resolution digital audio signals in particular require both a precise and stable clock as well as a clean and interference-free 5V power supply as the basis for high-quality D/A conversion. In addition, the USB interfaces of computers and notebooks are susceptible to electromagnetic interference and signal noise. The Oehlbach PureClock almost completely eliminates the clock jitter and high-frequency interference signals known as "jitter" and guarantees perfect synchronization between USB interface and converter.

## Product properties

<b>Features</b>	24kt gold plated contacts, 100% contact reliability
<b>Colour</b>	Anthracite
<b>Quality level</b>	Performance
<b>Connection type</b>	Audio
<b>Plug type 2</b>	USB-A
<b>Product Category</b>	Electronics
<b>Signal direction</b>	OUT
<b>Plug type 1</b>	USB 2.0 Typ A Buchse
