

# Air Cylinder | Silver

Product number	D1C55052
Weight	0.853kg
Length	55mm
Width	150mm
Height	150mm

## Product description

These innovative shock absorbers have been designed to effectively insulate sensitive audio equipment from the floor. Vibrations that would otherwise negatively affect the sound have no chance thanks to a particularly innovative design that uses no mechanical spring elements whatsoever. Two precision-made metal cylinder halves contain the specified air volume whereby two precisely fitted silicone rings create a complete hermetic seal for the two chambers. The rubberized rests help create a reliable connection to the surface on which they stand.

## Product properties

Features	Air damping, Max. load bearing capacity 20 kg
Connector material	Full metal
Quality level	State of the Art
Product Category	Resonance damper
Colour	Chrome
