### Product description

HDMI® cables with very flat angled plugs for highest flexibility of use. They're particularly good for HDMI® sockets positioned on the side of TV sets where the number of sockets frequently means that there isn't much space. The high-quality inner conductor made from OFC copper with dual shielding and 24-carat goldplated plug contacts also guarantee the absolutely stable and interference-free transmission of signals. Furthermore, the cable is also equipped with two different HDMI connectors, which are angled by 40°. This makes the cable particularly suitable for side HDMI ports on LCD TVs. Multiple connectors can even be positioned one above the other in a "piggyback" configuration.
