

HIGH END HEADPHONE AMPLIFIER WITH INTEGRATED DA-CONVERTER

DAC ULTRA

The XXL DAC Ultra headphone amplifier from Oehlbach offers up to 384 kHz sampling rate and 32-bit sampling depth via USB. High-quality Burr Brown digital/analogue converters work inside the housing for absolute signal purity and maximum acoustic performance. Whether sophisticated high-end bracket headphones or compact InEars, the XXL DAC Ultra is the perfect partner for connected headphones. In addition to USB, an optical and coaxial digital input as well as analogue RCA inputs are available. Playback is via two 6.3 mm jack outputs and stereo RCA. Compatible to Apple OSX, MacOS is not supported.
