

WIRELESS AUDIO TRANSFORMER FOR SUBWOOFER FALCON SUB

MSRP (19%): 149.99

The Falcon Sub Wireless Subwoofer Extender enables the lossless wireless transmission of a subwoofer signal over a range of up to 15m and thus offers high flexibility regarding the location of the subwoofer. The transfer in the 2.4 GHz WiFi range enables an extremely low latency of less than 20ms and ensures high connection stability. An absolutely precise signal transport guarantees a clean reproduction with all details and fine structure, hum loops are no problem. The compact device has low power consumption and also offers an auto-standby function.
