

HIGH-SPEED HDMI® CABLE WITH ETHERNET

SCREEN MAGIC MAX

High-speed HDMI® cable with optimized plug design for perfect handling and safe connections. The additional data channel (Ethernet channel) allows Internet-enabled AV components, e.g. Blu-ray players and AV receivers, to be connected without the need for additional network cables. An inner conductor made from silver-plated copper (SPC) with triple shielding guarantees loss-free signal transmissions. The 24-carat gold-plated metal plugs create absolutely safe and reliable contacts in all application situations. They are also responsible for extremely effective protection against corrosion. In terms of material and aesthetics, this high-quality four-star cable comes complete with a durable and particularly flexible fabric sheathing and soundly built full-metal connectors. The cable fully supports „HDMI high-speed“ up to lengths of 20 metres!
