DISPLAY PORT CABLE

TRANSDATA DP

This multimedia cable, which conforms to the VESA standard (VideoElectronics Standard Association), is used for the transmission of digital audio and video signals. The display port cable is normally used to connect PCs and notebooks to TFT monitors and flat-screen TVs equipped with corresponding interfaces. The 20-pin connector features a mechanical lock which guarantees a very stable connection and prevents disruptive loose contacts.

Outer sheath material	Ultra-thin individual wires, plastic, Robust plastic sheathing
Inner conductor material	OFC - oxygen-free copper
cable geometry	Round
Shielding	Multiple shielding
Shielding construction	1 x aluminium foil + 1 x copper braiding
Features	30 years warranty, 24kt gold plated contacts , Reliable contact, Resolutio up to 1920x1200, 20-pin plug, Supports HDCP and DPCP, Supports RGB, xvYCC and YCbCr
